Approval of Revised CTF Investment Plan for Mexico, including update of the Mexico Private Sector Energy Efficiency Program (IDB)

The CTF Trust Fund Committee notes the requested changes and financial restructuring to the projects within the *Mexico Private Sector Energy Efficiency Program*, and endorses the document, *Amendment to the Mexico CTF Investment Plan and to the Mexico Private Sector Energy Efficiency Program*, submitted by the Government of Mexico and IDB. The proposed changes to the Investment Plan and to the Program include:

a) Widening the scope of the Program, by expanding the beneficiaries to include other financial intermediaries, in addition to commercial banks, and including behind-the-meter small-scale renewable energy as an additional eligible technology.

b) Reducing the total amount of CTF funding for the Mexico Private Sector Energy Efficiency Program by USD 2.0 million, from USD 24.4 million to USD 22.4 million.

c) Reallocating USD 2.0 million in CTF funding from the Mexico Private Sector Energy Efficiency Program to a new public sector stand-alone FIRA Green Line project.
