Joint Communication

Lao PDR Forest Investment Program – Joint Technical Mission

September 8-16, 2011

I. Introduction

1. This Aide Memoire provides a record of the technical discussions held between Lao FIP MDBs (ADB, IFC, WB) and Government counterparts and discussions with other REDD stakeholders during the Joint MDB Technical Mission. The Aide Memoire also reports on the conduct of a National Consultation Workshop held in Vientiane on September 9, 2011 and two Regional consultation workshops held in Luang Prabang (for Bokeo, Huaphan, Luang Prabang and Xayabury Provinces; held on Sept 13, 2011) and in Thakhek (for Attapeu, Bolikhamsay, Khammouane, Saravanh Provinces; held on Sept 15, 2011) that were carried out during the mission.

2. This Aide Memoire was discussed and finalized between the MDBs and the Ministry of Agriculture and Forestry (MAF), on behalf of GOL. The MDB mission members1 appreciated the thorough preparations and hospitality provided by the Government of Lao PDR and look forward to continued discussions with Lao PDR on their proposed investment plan and preparations for the presentation of the Investment plan to the FIP Steering Committee in November 2011.

II. Mission Objectives, Discussions and Outputs

3. Objectives – During the Joint Technical Mission the MDB mission members worked together with GOL counterparts to;

   (a) Review and assess the REDD+ themes proposed for inclusion in the Lao Investment Plan to ensure their focus on and help to address the drivers of deforestation and forest degradation identified in Lao’s Readiness Plan Proposal (RPP);

---

Asian Development Bank - Mr. Sanath Ranawana, Senior Natural Resources Management Specialist, ADB FIP Co-Task Team Leader (via VC); Ms. Sisavanh Phanouvang, Senior Project Implementing Officer, ADB Lao PDR Resident Mission; Mr. Alastair Fraser, Forest Carbon Specialist, EOC, ADB Bangkok Residence Mission; Mr. Kolakanh Khamphilavong Economist and FIP Consultant; ADB Lao PDR Resident Mission;

World Bank - Dr. Peter Jipp, Senior Natural Resource Management Specialist, FIP Co-Task Team Leader, WB Bangkok; Ms. Khamlar Phonsavat, Environment/Climate Change Analyst, WB Lao PDR; Mr. Satoshi Ishihara, Senior Social Safeguards Specialist, WB Lao PDR; Mr. Thalavanh Vongsonephet, Program Assistant, WB Lao PDR; Mr Sybounheuang Phandanouvong, Social Safeguards Specialist WB Lao PDR; International Finance Corporation Mr. Aimilios Chatzinikolaou, Head of IFC Lao PDR and FIP Co-Task Team Leader; Mr. Stephen Midgley, Forestry Consultant, IFC Lao PDR; Ms. Vonglatda Omany, Operation Analyst, IFC Lao PDR.
(b) Review GOL’s draft Lao Investment Plan for accuracy, completeness and consistency with FIP investment criteria and alignment with relevant regulatory frameworks, and national and sectoral strategies; and

(c) Consult with key stakeholders at National and Regional levels through Stakeholder Consultation Workshops that included participation of representatives from line ministries, donors, private sector, development partners working on REDD+, CSOs/NGOs working on REDD+, conservation, and rural livelihoods and private sector representatives).

4. The Department of Forestry (DoF) under the MAF in coordination with, and on behalf of, the National REDD Taskforce organized and chaired the National and Regional Consultation workshops.

5. **Internal GOL Discussions** – GOL convened internal discussions among representatives of implementing agencies on August 18, 2011 and September 6, 2011 to exchange views and to discuss options for FIP investments. These internal discussions evaluated the potential contributions of the proposed activities under FIP to implementation of Government’s Forest Strategy 2020 and the country’s Readiness Plan Proposal (R-PP). These discussions reviewed and confirmed alignment of the proposed investment alternatives under FIP with Government’s priorities. Preparations for the internal discussion were supported by international and national consultants hired by GOL to provide analytical and drafting support for the preparation of the Lao Investment Plan. The outcome of these discussions was a broad endorsement of proposals that had been tabled earlier (including expansion of payment for environmental services, inclusion of support for smallholder forestry, and support for Forest Law Enforcement and Governance). The internal discussions also raised important new alternatives to addressing deforestation and forest degradation in unclassified forest (areas outside of classified forest represent approximately 30% of the total forest area of Lao PDR).

6. **FIP IP Themes Identified by GOL** – GOL has recommended 4 themes for inclusion in the Lao Investment Plan:

   - **Scaling-up Participatory Sustainable Forest Management (PSFM)** in state forest areas (Production, Conservation and Protection Forest Areas) by state line agencies with active participation of villagers from all ethnic groups.

   - **Village forestry** covering management, protection and production activities in designated village forests by villagers from all ethnic groups and supporting communal titling. To be implemented in unclassified forest areas.

   - **Smallholder forestry**, linked to Industrial Tree Plantation (ITP) development, covering the allocation of land to farmers of all ethnic groups for agricultural development and tree growing in land adjacent or nearby ITPs with support provided by private enterprises.
• **Strengthening Enabling Frameworks** including the legal, governance, incentives, and REDD+ frameworks to successfully implement the three forest area-based themes identified above. This is expected to include strengthening of the legal/regulatory framework, especially to increase the benefits shared by grassroots forest managers from both traditional (e.g. forest products) and emerging revenue streams (e.g. PES, REDD+); improving forest governance, especially in MAF and MONRE for sustainable forest management and DOFI for law enforcement; capacity building; and other aspects, such as MRV and knowledge management.

7. GOL has endorsed the idea of clustering these themes (in varying combinations) under a total of three projects that will be implemented in coordination with ongoing and planned operations of the participating MDBs. The link to ongoing and planned operations are intended to: i) ensure effective coordination at the local level; ii) maximize efficient use of human resources; and iii) take advantage of teams and communities that are mobilized to introduce and/or scale-up ongoing forest protection and management activities across all forest types in a given region.

8. **Village Forest** – The mission appreciated GOL’s renewed commitment to expanding and strengthening the incentives for Village Forest protection and management. GOL has estimated that 30% of Lao forest is unclassified and falls outside of designated Conservation, Protection and Production Forests. GOL considers Village Forest allocation to be an important tool to avoid deforestation and forest degradation in these areas. As the draft Lao Investment Plan notes – under Lao Law customary utilization of forests is recognized, and village forests can be established to allow the use of timber and harvest of forest products for household use in accordance with a designed plan and the laws and regulations on forests. Through a Participatory Land Use Planning (PLUP) process, agriculture and forest land are delineated and may be allocated as village forests according to local circumstances. The MDBs appreciated GOL’s proposal to develop a Village Forest theme under FIP and transfer rights in these areas to local communities. MDBs agree with GOL’s assessment that expansion of Village Forest may help address the relatively high rates of forest cover loss in unclassified forest and would also be expected to contribute to poverty alleviation in forest dependent communities.

9. **Smallholder Forestry** – Under this theme FIP support is expected to foster improved practices in private sector investments in forestry in Lao PDR is needed to achieve Lao’s national goals for REDD and forest cover (FS2020) and poverty reduction. Specific private sector investment opportunities can be identified and endorsed at the project preparation phase; Capital investments are expected to be made by private sector directly or through IFC loans for eligible borrowers; FIP resources are expected to be used to engage smallholders in farm forestry, and build relevant capacity at the local level, develop contracting standards, targeted land-use planning allocation and titling, among others.

10. **Implementation Arrangements** – Based on discussions held during the mission it is expected that a National REDD+ Office (NRO) will be set up shortly and this office will coordinate and provided oversight for all REDD+ related work in Lao PDR. The NRO will manage all REDD+ related activities in Lao PDR including the RPP implementation grant and the FIP project preparation efforts (across all MDBs). The NRO will also take the lead in reporting on implementation progress with REDD activities and coordinating new entrants interested in funding REDD+ related activities in Lao PDR. Active coordination in the REDD arena will help Lao PDR to ensure that funding gaps are filled, duplication of efforts is avoided and lessons learned from pilots are captured and shared.

11. During the mission it was discussed and broadly understood that FIP funding will be channeled through the participating MDBs following each institution’s procedure for project preparation, safeguard review, financial management and procurement. Once project proposals have been prepared and successfully negotiated with government they will be submitted for Board review and approval. Once endorsed the project funding will be disbursed according to standard project financing procedures. FIP funds will be disbursed by MDBs to a project specific account and reimbursements to the project account will be based on documented expenditures consistent with agreed procurement plans. Technical Assistance projects may be approved as either recipient executed or MDB executed according to agreements reached during the project design phase.

12. **National and Regional Workshops** – A national workshop was organized on September 9, 2011 in Vientiane Capital to consult and discuss the themes identified in the draft Investment Plan, the Result Framework and the possibility of engaging the local communities including women and CSOs under the DGM and FIP. More than 100 participants attended the workshop from the line government ministries, key government representatives from the selected provinces, Lao Women’s Union, Lao National Front for Construction (ethnic group representatives from the private sector and CSOs, and development partners engaged in REDD+ and forestry in Lao PDR. Two other regional stakeholder consultation workshops were held on September 13 and 15, 2011 respectively to discuss with a wide range of participants the themes identified in the draft Investment Plan as well as the possible implementing partners and potential use of funds made available to the local people through the Dedicated Grant Mechanism (DGM) The estimated allocation for Lao PDR under the DGM is approximately 5.5% of $50-75M or $4 million (on top of the $20-30M FIP allocation).

13. Consultation workshop participants agreed broadly with the proposed themes and concepts outlined in the draft FIP Investment Plan. Specifically, they welcomed the new initiative on expanding village forest and the greater benefit sharing to local people who are dependent on and therefore guardians of Lao PDR’s forests. This was seen as helping the government address near term goals for poverty alleviation and increased forest cover. Stakeholders also expressed support for private sector support to small holders to expand livelihood alternatives, strengthen tenure, and increase their involvement in commercial tree
plantations through piloting agro-forestry especially in degraded areas. CSOs representatives and provincial government staff welcoming the grant allocated under the DGM for local people and ethnic groups. Some concerns were expressed including in relation to illegal logging, lack of local consultation on concessions and need for simple and robust documentation to control illicit log transport.

**Dedicated Grant Mechanism (DGM)**

14. The MDBs informed the participants at the workshops on the progress of the DGM. In the break out group, the utilization of the fund from the DGM for the ethnic groups and local people in Lao PDR was raised for discussions. The feedback received from the discussions is that the fund shall be used to benefit local people, especially the vulnerable ethnic groups, as much as possible and in a sustainable manner. In achieving these, the process in transferring and approving the funds to the locals shall be short and simple. There is a need to engage the government in the DGM to ensure that the local people can participate. Since this grant may be administered by the World Bank, not the government (Ministry of Finance), it was suggested that the relevant government counterpart may be informed of the DGM activities, through becoming a member of the National Steering Committee of the DGM. The use of local language for the fund application and communication is crucial. The grant shall be used in a few years to implement as working with people and growing the trees can take a few years to see the impacts.

15. Another option suggested for disbursement of the fund to the local people and achieving sustainability is through the Village Development Fund (VDF) where the local people can manage funds themselves through a Village Committee. Further training is requested to ensure that funds are used as per the criteria and according to the plan. Assessments of the locals’ capacity and readiness are necessary before giving them the fund. Agreement between the village and the fund executing agency shall be made to record the commitments made by the locals.

16. **Wrap-up with DOF** – A wrap-up meeting chaired by the Director of the Department of Forests was held on September 16, 2011. The mission’s conclusions and recommendations were shared and the schedule for further preparation steps was discussed and agreed.

17. **Joint Technical Mission Observations Conclusions and Recommendations**

- Mission observed that the Ministerial restructuring is proceeding and although this is taking some time (and is expected to take some additional months before the process is complete) this has not caused undue delays in FIP preparation; The mission noted the absence of representatives from the new Ministry of Natural Resources and Environment (MONRE) in the National Workshop (due to other commitments). The mission recognized that Senior officers of DoF that are slated to move and expected to take on leadership positions within the corresponding new departments within MONRE participated actively in the National Stakeholder Consultation Workshop. DOF confirmed
that outcomes of the stakeholder consultations and the draft investment plan will be shared with MONRE for their review and inputs.

- Mission noted that the FIP grant for IP preparation has been signed and the designated account has been established. Funds are now reported to be flowing to cover GoL expenditures associated with Lao Investment Plan preparation (consultancies, consultations, etc).

- The Mission noted that the Draft Lao Investment plan can be strengthened in respect to links with biodiversity conservation inside of designated Conservation Forests and in respect to Forest Law Enforcement and Governance in relation to threats to forest degradation driven by illicit international trade in timber.

- As per CIF FIP Subcommittee guidelines the draft Lao Investment Plan will be posted on the Department of Forestry (DOF) website for public review and comment on Tuesday, September 20, 2011.

- NEC Secretariat at MONRE informed the Mission that GOL’s FIP IP endorsement will be provided by MAF Minister as per guidance provided during June NEC meeting. NEC Secretariat requested to receive a copy of the draft with a cover letter documenting the consultation process and summarizing the proposed IP.

- World Bank team expects to submit the draft IP for an internal virtual quality enhancement review and share results of this review with GOL, IFC and ADB.

- During the mission it was discussed and more broadly understood that FIP funding will be channeled through the participating MDBs following each institution’s own procedure for project preparation, safeguard review, financial management and procurement.

- In the absence of a functioning DGM, WB and ADB will jointly support additional efforts to engage CSOs and Ethnic Groups until the DGM becomes operational.

- Remaining funds from IP preparation may be used for a variety of activities that will further consensus building and dissemination of information on REDD+ and FIP including but not limited to the following; FIP IP thematic retreats, public awareness campaign, additional provincial consultation and targeted engagement of Provincial authorities.

**List of Outputs**

- Presentations made at the National and Regional Workshops (English and Lao versions attached as Annexes)

- Workshop Participants List
- 7 -

III. Next Steps

18. The timeline of activities in the coming months is expected to include the following dates and deliveries:

<table>

Carbon Forestry

- The use of forested land for carbon sequestration and storage, including
  the reduction of emissions from deforestation and degradation (REDD+
  Forests) and the reduction of emissions from deforestation and degrada-
  tion (REDD+ Forests) in the carbon cycle.

- Biomass (wood) -> Carbon (C)

Closed Systems

- The use of forests to remove carbon dioxide (CO₂) from the atmosphere
  through photosynthesis, converting it into carbon (C) and oxygen (O₂).

- CO₂ → Plant → Carbon (C)

LULUCF

- Land Use, Land Use Change and Forestry (LULUCF)
  - Land use changes and forestry activities that:
    1. Reduce the net exchange of CO₂ with the atmosphere
    2. Increase the carbon content of biomass
    3. Decrease the carbon content of biomass

- An example of LULUCF is afforestation, where forests are planted
  to increase the carbon content of biomass.

- การบริหารจัดการด้านการเปลี่ยนแปลงสภาพภูมิอากาศ การบริหารจัดการด้านการเปลี่ยนแปลงสภาพภูมิอากาศ (REDD+)
FIP Purpose

Finance efforts to address the underlying causes of deforestation and forest degradation and overcome barriers that have hindered past efforts.

- Support REDD efforts of developing countries.
- Provide up-front bridge financing for REDD readiness reforms.
- Public and private investments identified through national REDD readiness strategies.
- Taking account of opportunities to help adapt to the impacts of climate change on forests, and contribute to multiple benefits such as biodiversity conservation, protection of the rights of indigenous peoples and local communities, poverty reduction and rural livelihoods enhancement.

FIP Investment Criteria

- Climate change mitigation potential
- Addressing drivers of deforestation and degradation
- Forest-related governance
- Country ownership, preparedness and capacity
- Leveraging additional financing including private sector
- Integrating sustainable development
- Inclusiveness of process and participation of stakeholders
- Capacity building measures
- Coordinating with other REDD+ efforts
- Demonstration, learning and impact capacity
- Safeguarding the integrity of natural forests
- Measurable outcomes and results-based approach

FIP Results Framework

Indigenous Peoples and Local Communities Dedicated Grant Mechanism

FIP design calls for dedicated grant mechanism for indigenous peoples and local communities.

Eligible activities may include support for:
- Strengthening the capacity of these groups to play an informed and active role in national REDD processes in general and FIP processes in particular.
- Recognizing and supporting their tenure rights, forest stewardship roles, and traditional forest management systems.
- Participation of these groups in the development of the FIP investment strategies, programs and projects.
- Implementation of projects as an integral component of country pilots.
**CIF Flow Chart - FIP Programming**

- Country Request and MDB Joint Mission Proposal/TOR
- Program Preparation Grant TOR Agreement and Mobilization
- Preparation of Background Materials for the Joint Mission

**Programming Phase**
- Country-led joint MDB missions to develop investment plan
- FIP-SC endorses investment plan
- FIP investment projects and programs prepared by country
- FIP-SC decides on FIP financing for projects or programs
- Further processing of projects in accordance with MDB procedures

**CIF FIP Country Selection and Resource Allocations**

- Lao PDR is one of eight countries selected as pilots for FIP in March 2010 (others are Indonesia, Burkina Faso, Mexico, Brazil, Democratic Republic of Congo, Ghana and Peru)

- The funding envelope for Lao PDR and Burkina Faso is between $20-30 million in grant financing (FIP/SC 5.5); Larger countries are slated to receive between $50-70M in a mix of grant and loan support.

**CIF Progress of Lao FIP**

- Lao PDR received a grant for $227,900 to prepare their FIP investment plan
- GOL has engaged with MDBs (ADB, IFC, WB) and representatives from civil society, private sector, and INGOs in a series of meetings to discuss possible activities to include in the Investment Plan
- Representatives from Lao participated in regional and global workshops to design the dedicated grant mechanism. Endorsement of the mechanism design is expected in November 2011.
- FIP investments will compliment the existing and planned REDD+ activities of other Development Partners in Lao PDR
- GOL plans to submit their Investment Plan to the FIP-Sub Committee in November 2011

**Khorb chai**
Designing the components of the FIP Lao Investment Plan

Vientiane, September 2012

Linking FIP and FS2020

To be able to attain the 70% forest cover target of FS2020, existing forests of the country must be protected from deforestation and degradation and the forest areas rehabilitated to increase forest cover.

REDD+ with FIP support

The rationale:

Linking FIP and FS2020

Forest areas of Lao PDR

- Production Forest Areas (3.1 M ha)
- Conservation Forest Areas (4.7 M ha)
- Protection Forest Areas (8.2 M ha)
- Village Forests (1.56 M ha)
- Industrial Tree Plantations (0.50 M ha)
- Smallholder Woodlots (0.50 M ha)

Components of FIP-LIP

1. Participatory, sustainable management of state forest areas
   - Production Forest Areas
   - Conservation Forest Areas
   - Protection Forest Areas

2. Village forestry

3. Smallholder forestry including link to ITP development

4. Forest Law enforcement and governance
   - Updating of the legal framework, especially for REDD+
   - Forest governance, especially in DoF for forest management and DoFi for law enforcement
   - Other aspects, e.g. MIU, benefit sharing, knowledge management, etc.
Component 1: Participatory, sustainable management of state forest areas

<table>
<thead>
<tr>
<th>Production Forest Areas</th>
</tr>
</thead>
<tbody>
<tr>
<td>- PSM-PIA piloted in 8 PAs in 4 provinces in 2004-2008</td>
</tr>
<tr>
<td>- Applied in 18 PAs in 9 provinces in 2004-present</td>
</tr>
<tr>
<td>- To be up-scaled to all 51 PAs, especially in Northern Luzon</td>
</tr>
<tr>
<td>- Through WP/FA-Philippines/techical support</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest management units in PAs</th>
</tr>
</thead>
<tbody>
<tr>
<td>- District-level NMA</td>
</tr>
<tr>
<td>- Village-cluster level sub-NMA (the lowest level FMU)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Main activities in PSM-PIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Organizing and capacity building of forest managers (DFO and VFOs)</td>
</tr>
<tr>
<td>- Resources assessment (timber, NTFP and High Conservation Value Forests)</td>
</tr>
<tr>
<td>- Sub-FMA management planning and integration to FMA management plan</td>
</tr>
<tr>
<td>- Sub-NMA management operations (including forest protection, harvesting, regeneration, rehabilitation of degraded areas, agroforestry, ecotourism, ...)</td>
</tr>
</tbody>
</table>

Component 2: Village forestry

<table>
<thead>
<tr>
<th>Watershed Protection Forest Areas</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Individual WPAs still to be established and officially declared</td>
</tr>
<tr>
<td>- JICA developing management guidelines for WPAs</td>
</tr>
<tr>
<td>- Participatory, sustainable management involving villages</td>
</tr>
<tr>
<td>- Through ADB as the FIP MOI and JICA co-financing/technical support</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Watershed management units in WPAs</th>
</tr>
</thead>
<tbody>
<tr>
<td>- District-level WMA, similar to PSM-PIA</td>
</tr>
<tr>
<td>- Village-cluster level sub-WMA (similar to PSM-PIA)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Main activities in PSM-WPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Organizing and capacity building of watershed co-managers (DFO and VFOs)</td>
</tr>
<tr>
<td>- Sub-WMA protection planning</td>
</tr>
<tr>
<td>- Sub-WMA management operations (including forest landscape-based livelihoods in non-critical areas, e.g., sustainable agroforestry, watershed rehabilitation, watershed protection, ecotourism, ...)</td>
</tr>
</tbody>
</table>

Component 3: Smallholder forestry including link to ITP development

<table>
<thead>
<tr>
<th>PLUP-LA in rural areas, starting with villages near PSM-SFA/ITP project sites</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Identification, delineation, and allocation of farmers’ land</td>
</tr>
<tr>
<td>- Registration of farmers’ land</td>
</tr>
<tr>
<td>- Farmers’ land-use planning and allocation to crops</td>
</tr>
<tr>
<td>- Land will be available for smallholder woodlots</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Two sub-components</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Target together with village forestry is rehabilitation of 0.5 million ha of degraded land and protection of existing forests outside the state forest areas</td>
</tr>
<tr>
<td>- Sub-component 3.1: Smallholder forestry attached to PSM-SFA projects</td>
</tr>
<tr>
<td>- Sub-component 3.2: Smallholder forestry linked to ITP Development</td>
</tr>
</tbody>
</table>
Component 3: Smallholder forestry and link to ITP development

- Support in PLUP-IA and farmers’ land registration
- Provision of seedlings, technical assistance, and market information, including bundling for carbon/REDD+
- Support for forest-based livelihood development

Smallholder forestry linked to ITP development
- Companies engaged in ITP development to be encouraged to support farmers in adjacent or nearby areas to plant trees in their own land, especially those applying for IFC financing
- Coordination with other projects to provide support to or to prioritize smallholder woodlots in their activities, e.g., UN/FAO removal
- Provision of seedlings, technical assistance, and market for harvested wood
- Cost of seedlings to be offset from wood revenue

Component 4: Law enforcement and governance

- Policy and legal framework
  - Provisions for REDD+, benefit sharing
  - Provisions for secure tenure for land and trees in village forests, ITPs, and smallholder woodlots

- Law enforcement
  - Capacity building in DOFI
  - Law enforcement led by DOFI

- Other aspects of governance
  - MIY systems
  - Knowledge management

</table>

**Notes:**
- The table contains information about names, organizations, positions, phone numbers, email addresses, and signatures.
- Each row represents a different entry with the fields corresponding to name, organization, position, phone number, email address, and signature.
- The table is repeated multiple times with the same structure and content, indicating a list or registry of some sort.
