Review of Revised SREP Results Framework and Request for Further Revision

The Sub-Committee reviewed the document, *Proposal for Revised SREP Results Framework*, and welcomes the simplification in order to have smaller number but more focused indicators. The Sub-Committee requests the CIF Administrative Unit to take the Sub-Committee’s comments regarding investments, CO2 emissions, and employment into account in proposing a revised SREP results framework to be circulated to the Sub-Committee for approval by mail before the end of March. Thereafter, if approved by the Sub-Committee, the revised SREP results framework should be submitted for consideration and approval by the SCF Trust Fund Committee at its meeting during the week of April 30, 2012.
