Consensus on General Principles (p5)

1. **FIP results frameworks** in endorsed investment plans will be the **basis for** mid-term and ex-post **evaluation** only.
2. **Countries will report annually** on progress with the implementation of the investment plan level.
3. **Annual report** will consist of a mix of **quantitative and qualitative information**.
4. **A narrative** should provide reflections on programmatic aspects (e.g., validity of theory of change).
5. **Results measurement** and reporting is an iterative and **learning process** – countries should report challenges that require further support.

Proposed Framework for Annual Report (p6)

- a. **Common themes** to be reported on by all FIP pilot countries (2)
- b. **Other relevant co-benefit themes** as they apply to country investment plan (up to 4)
- c. **A narrative**

Common Themes

- i. GHG emission reductions / enhancement of carbon stocks; and**
- ii. Livelihoods co-benefits**

Other Co-Benefit Themes

- i. Biodiversity and other environmental services**
- ii. Governance**
- iii. Tenure, rights and access; and**
- iv. Capacity development**

Narrative Topics

- i. **Five common topics** to be annually reported on by all FIP pilot countries (similar to “updates”)
- ii. **Other potential themes** as agreed in the FIP Sub-Committee (not annually)

Moving forward...

Giving FIP pilot countries the opportunity for more realistic expected results

Proposal: Countries are invited to consider revising, streamlining, and adapting the results frameworks in their endorsed investment plans to reflect a more realistic set of expected results from FIP investments.

THANK YOU !

The background of the slide is a photograph of a lush, green forest. Large, moss-covered tree trunks and branches are prominent, with sunlight filtering through the dense canopy of green leaves. The scene is vibrant and natural.
