Introduction

The Climate Investment Funds (CIF) were established in 2008 and comprise two trust funds. The Clean Technology Fund (CTF) provides resources to scale up low-carbon technologies with a significant potential for long-term greenhouse gas emissions savings. The Strategic Climate Fund (SCF) provides financing to pilot new development approaches or scale-up activities aimed at a specific climate change challenge or sectoral response. The SCF currently finances three such programs: the Forest Investment Program (FIP), Pilot Program for Climate Resilience (PPCR), and Scaling Up Renewable Energy in Low-Income Countries Program (SREP).

The World Bank acts as the Trustee for the CIFs. This report is produced by the Trustee based on financial information as of September 30, 2020, in accordance with the Trustee's role as set forth in the Governance Framework for the SCF which states:

"The Trustee will provide to the SCF Trust Fund Committee, and, to the extent applicable, any SCF Sub-Committee, regular reports on the financial status of the Trust Fund, as agreed between the Trustee and the SCF Trust Fund Committee, or as the case may be the relevant SCF Sub-Committee."

Regular financial reporting is provided through the Trustee's website: www.fiftrustee.worldbank.org. This report has been prepared specifically for the SCF Trust Fund Committee (TFC) to provide: (i) a snapshot of the financial status of the SCF Trust Fund as of September 30, 2020; (ii) the status of pledges and contributions, and (iii) the status of the three SCF Programs (FIP, PPCR, SREP).

1.2. Asset Mix and Investment Returns and Adjustment for Changes in Market Conditions

The undisbursed cash balance of the SCF Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by IBRD. The Pool is managed actively and conservatively with capital preservation as the over-arching objective.

ASSET MIX

SCF Trust Fund assets are invested across three of the World Bank Trust Fund’s investment model portfolios, (“Model Portfolio 0” for short term working capital needs, “Model Portfolio 1” with an investment horizon of one year, and “Model Portfolio 2” with a broader investment universe and an investment horizon of three years). The investment objectives for the SCF Trust Fund are to optimize investment returns subject to preserving capital and maintaining adequate liquidity to meet foreseeable cash flow needs, within a conservative risk management framework¹. Although actual future returns will depend on market conditions, the Trust Fund Investment Pool is actively monitored and adjusted to preserve development partner funds over the investment horizons. Over shorter periods however, market volatility may result in negative actual or ‘mark-to-market’² returns. Overall, the SCF Trust Fund cumulative returns have been driven by its investment in longer-term model portfolios, which may be exposed to higher volatility in returns over shorter periods but are expected to have higher returns over longer periods.

As of September 30, 2020, the portfolio allocation by asset class has the largest allocations to government securities, mortgage backed securities (MBS), money market instruments and covered bonds.

Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio. These hedges remain in place.

¹ On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds which is defined as limiting the estimated average loss to the portfolio in the worst 1% of loss events. The World Bank Model Portfolios have their overall market risk constrained by a CVaR measure as follows:

The risk constraint of Model Portfolio 1 is expressed as the 1-year 99% Conditional VaR being no worse than -25bps

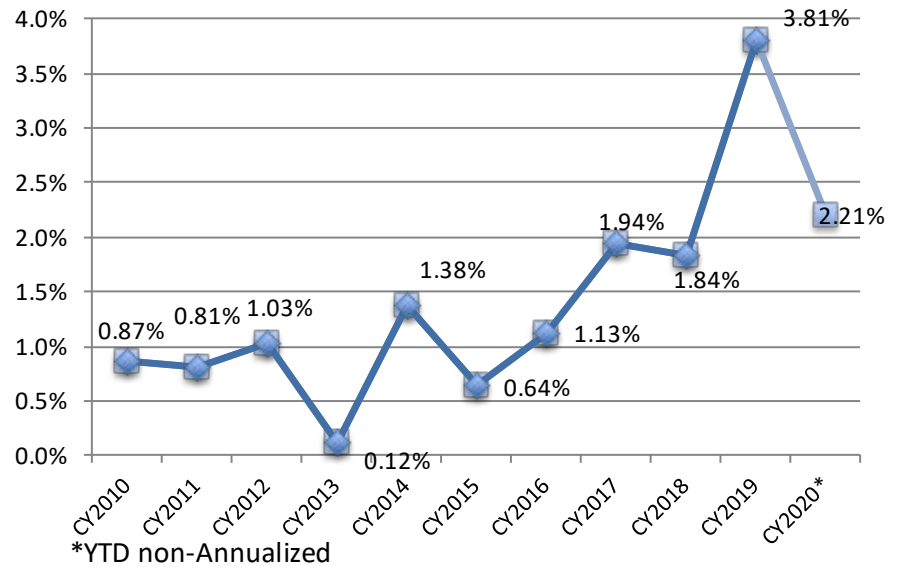

The risk constraint of Model Portfolio 2 is expressed as the 3-year 99% Conditional VaR being no worse than -100bps.

² Mark-to-market gains or losses represent unrealized gains or losses resulting from changes in the value of securities in the portfolio which have not yet been sold.

INVESTMENT RETURNS

The SCF Trust Fund liquid portfolio earned USD 150.0 million in investment income since inception. The portfolio returns through September of calendar year 2020 was 2.21% (non-annualized).

1.3. Cumulative Net Commitments
